Lead in Drinking Water Remediation Plan for Outlets that Exceed 5ppb

- 1) Remove outlet from service immediately after receiving test results indicating this outlet has exceeded the actionable level.**
- 2) Permanently remove or replace outlet.**
- 3) All replaced outlets will be re-tested before being put back into service.**
- 4) Any outlet taken out of service that is primarily used for cleaning or hand washing will be posted with signage indicating the water should not be used for human consumption.**
